Table of Contents

Executive Summary S-1

Chapter 1: Purpose and Need 1-1
1-1 Introduction 1-1
1-2 Project History 1-1
1-3 Background and Planning Context 1-3
1-3-1 Transportation Context.....1-3
1-3-2 Regional Context.....1-3
1-4 Purpose 1-4
1-5 Need 1-4
1-5-1 Structural Deficiencies.....1-4
1-5-2 Operational and Safety Deficiencies 1-5
1-5-3 Security Deficiencies 1-5
1-5-4 Mobility Deficiencies.....1-6
1-6 Goals and Objectives.....1-6

Chapter 2: Project Alternatives 2-1
2-1 Introduction 2-1
2-2 Alternatives Analyzed in this Environmental Impact Statement 2-1
2-2-1 No Build Alternative.....2-1
2-2-2 Replacement Bridge Alternative 2-3
2-3 Alternatives Considered and Eliminated 2-14
2-3-1 Rehabilitation Alternative.....2-14
2-3-2 Tunnel Alternative 2-15
2-3-3 Single Structure Alternative 2-16

Chapter 3: Process, Agency Coordination, and Public Participation 3-1
3-1 Introduction 3-1
3-2 Process.....3-1
3-2-1 National Environmental Policy Act (NEPA) 3-1
3-2-2 State Environmental Quality Review Act (SEQRA) 3-2
3-2-3 Other Federal and State Regulatory Requirements, Permits, and Approvals 3-3
3-2-4 Section 106 Coordination 3-6
3-2-5 Section 4(f) Coordination.....3-7
3-2-6 Environmental Justice Coordination 3-7
3-3 Agency Coordination.....3-7
3-3-1 SAFETEA-LU Coordination Plan.....3-7

3-3-2 Permits and Approvals 3-8
3-4 Public Outreach Program 3-9
3-5 Repositories 3-11
3-6 Contact Information 3-12

Chapter 4: Transportation 4-1
4-1 Introduction 4-1
4-2 Regulatory Context 4-1
4-3 Methodology 4-2
4-3-1 Travel Demand Modeling 4-2
4-3-2 Accident Analysis 4-3
4-4 Affected Environment 4-3
4-4-1 Vehicular Traffic 4-3
4-4-1-1 Volumes and Travel Patterns 4-4
4-4-1-2 Safety and Accident History 4-5
4-4-2 Marine Transport 4-9
4-4-3 Transit 4-10
4-4-4 Bicycles and Pedestrians 4-11
4-5 Environmental Effects 4-11
4-5-1 No Build Alternative 4-11
4-5-1-1 Traffic 4-11
4-5-1-2 Marine Transport 4-14
4-5-1-3 Transit 4-14
4-5-1-4 Bicycles and Pedestrians 4-14
4-5-2 Replacement Bridge Alternative 4-14
4-5-2-1 TraffiC 4-14
4-5-2-2 Marine Transport 4-15
4-5-2-3 Transit 4-16
4-5-2-4 Pedestrians and Cyclists 4-16
4-6 Mitigation 4-16

Chapter 5: Community Character 5-1
5-1 Introduction 5-1
5-2 Regulatory Context 5-1
5-2-1 FHWA Technical Advisory T6640.8A 5-2
5-3 Methodology 5-2
5-4 Affected Environment 5-2
5-4-1 Existing Land Uses and Neighborhood Character 5-3
5-4-1-1 Town of Orangetown, Rockland County 5-3
5-4-1-2 Village of South Nyack, Rockland County 5-3
5-4-1-3 Village of Grand View-on-Hudson, Rockland County 5-4
5-4-1-4 Village of Tarrytown, Westchester County 5-4
5-4-1-5 Hudson River 5-6
5-4-2 Regional Land Use Plans and Policies 5-6

5-4-2-1 New York Metropolitan Transportation Council 5-6
5-4-2-2 Hudson River Valley Greenway Act.....5-7
5-4-2-3 Hudson River Valley National Heritage Area Management Plan 5-10
5-4-3 Local Land Use Plans and Policies 5-10
5-4-3-1 Rockland County 5-11
5-4-3-2 Town of Orangetown, Rockland County 5-14
5-4-3-3 Village of South Nyack, Rockland Conty 5-14
5-4-3-4 Village of Grand View-on-Hudson, Rockland County 5-14
5-4-3-5 Westchester County 5-14
5-4-3-6 Village of Tarrytown, Westchester County.....5-15
5-4-4 Zoning Ordinances 5-16
5-4-5 Community Facilities and Services.....5-17
5-4-6 Planned Developments 5-18
5-5 Environmental Effects 5-18
5-5-1 No Build Alternative 5-18
5-5-2 Replacement Bridge Alternative 5-18
5-5-2-1 Land Use and Neighborhood Character 5-19
5-5-2-2 Regional Land Use Plans and Policies.....5-21
5-5-2-3 Local Land Use Plans and Policies 5-21
5-5-2-4 Zoning 5-24
5-5-3 Community Facilities and Services.....5-24
5-6 Mitigation 5-25

Chapter 6: Land Acquisition, Displacement, and Relocation 6-1
6-1 Introduction 6-1
6-2 Regulatory Context 6-2
6-3 Methodology 6-2
6-3-1 Delineation of Properties to be Acquired 6-2
6-3-1-1 Valuation of Properties 6-2
6-3-2 Data Sources.....6-3
6-3-3 Impact Criteria 6-4
6-4 Affected Environment.....6-4
6-4-1 Properties for Acquisition 6-4
6-4-1-1 Rockland County 6-4
6-4-1-2 Westchester County 6-6
6-5 Environmental Effects 6-7
6-5-1 No Build Alternative 6-7
6-5-2 Replacement Bridge Alternative 6-7
6-5-2-1 Rockland County 6-7
6-5-2-2 Westchester County 6-13
6-6 Mitigation 6-14
6-6-1 Displacement.....6-14
6-6-1-1 Residential Displacement 6-14

6-6-1-2 Parking Displacement 6-15
6-6-2 Reduction in Property Tax Revenues 6-15

Chapter 7: Parklands and Recreational Resources 7-1
7-1 Introduction 7-1
7-2 Regulatory Context 7-1
7-3 Methodology 7-1
7-4 Affected Environment 7-1
7-4-1-1 Elizabeth Place Park and Adjacent Green Space Area 7-3
7-4-1-2 Palisades of the Hudson National Natural Landmark 7-3
7-4-1-3 Hudson River Greenway Water Trail 7-4
7-4-1-4 Hudson River Recreational Boating 7-4
7-4-1-5 Riverwalk 7-4
7-5 Environmental Effects 7-4
7-5-1 No Build Alternative 7-4
7-5-2 Replacement Bridge Alternative 7-5
7-6 Mitigation 7-6

Chapter 8: Socioeconomic Conditions 8-1
8-1 Introduction 8-1
8-2 Methodology 8-2
8-2-1 Study Area Delineation 8-2
8-2-2 Data Sources 8-2
8-3 Affected Environment 8-3
8-3-1 Social Conditions 8-3
8-3-1-1 Population 8-3
8-3-1-2 Population Projections 8-3
8-3-1-3 Age Distribution 8-4
8-3-1-4 Disabled Population 8-4
8-3-1-5 Households 8-5
8-3-1-6 Median Household Income & Poverty Status 8-6
8-3-1-7 Housing Unit Characteristics 8-6
8-3-1-8 Housing Value Characteristics 8-7
8-3-2 Economic Conditions 8-7
8-3-2-1 Labor Force 8-7
8-3-2-2 Employment 8-9
8-3-2-3 Unemployment 8-11
8-4 Environmental Effects 8-11
8-4-1 No Build Alternative 8-11
8-4-2 Replacement Bridge Alternative 8-11
8-4-2-1 Social Conditions 8-12
8-4-2-2 Economic Conditions 8-13
8-5 Mitigation 8-13

Chapter 9: Visual and Aesthetic Resources.....9-1
9-1 Introduction 9-1
9-2 Regulatory and Guidance Context.....9-1
9-3 Methodology 9-1
9-4 Affected Environment.....9-2
9-4-1 Visual Character of Interstate 87/287 and the Tappan Zee Bridge 9-3
9-4-1-1 Interstate 87/287.....9-3
9-4-1-2 Tappan Zee Bridge.....9-3
9-4-2 Visual Character of the Study Area 9-4
9-4-2-1 Landform 9-4
9-4-2-2 Vegetation 9-4
9-4-2-3 Water.....9-5
9-4-2-4 Manmade Development and Land Use 9-6
9-4-3 Visual Quality 9-8
9-4-4 Views and Viewer Groups 9-8
9-4-4-1 Interstate 87/287 Motorists 9-8
9-4-4-2 Boaters 9-9
9-4-4-3 Viewers in Rockland County.....9-9
9-4-4-4 Viewers in Westchester County.....9-12
9-5 Environmental Effects.....9-15
9-5-1 No Build Alternative.....9-15
9-5-2 Replacement Bridge Alternative—Short Span Option 9-15
9-5-2-1 Rockland County 9-15
9-5-2-2 Hudson River Crossing.....9-17
9-5-2-3 Westchester County 9-23
9-5-3 Replacement Bridge Alternative—Long Span Option.....9-24
9-5-3-1 Rockland County 9-24
9-5-3-2 Hudson River Crossing.....9-25
9-6 Mitigation 9-27

Chapter 10: Historic and Cultural Resources 10-1
10-1 Introduction 10-1
10-2 Regulatory and Guidance Context 10-1
10-2-1 National Historic Preservation Act (Section 106).....10-1
10-2-2 Section 4(f) of the U.S. Department of Transportation Act 10-3
10-2-3 New York State Historic Preservation Act 10-3
10-3 Methodology.....10-3
10-3-1 Definition of the Area of Potential Effect.....10-3
10-3-2 Identification of Historic Properties Within the APE 10-6
10-3-2-1 Architectural Resources.....10-6
10-3-2-2 Archaeological Resources 10-7
10-3-3 Evaluation of Potential Effects on Historic Properties.....10-8
10-4 Affected Environment.....10-8

10-4-1 Architectural Resources 10-8
10-4-2 Archaeological Resources 10-19
10-4-2-1 Submerged Paleo Landform 10-19
10-4-2-2 Submerged Historic Resources and Potential Shipwrecks 10-20
10-5 Environmental Effects 10-22
10-5-1 No Build Alternative 10-22
10-5-2 Replacement Bridge Alternative 10-22
10-5-2-1 Architectural Resources 10-22
10-5-2-2 Archaeological Resources 10-32
10-6 Mitigation 10-32
10-6-1 Architectural Resources 10-32
10-6-2 Archaeological Resources 10-33

Chapter 11: Air Quality 11-1
11-1 Introduction 11-1
11-2 Regulatory Context 11-1
11-2-1 Pollutants for Analysis 11-1
11-2-2 National and State Air Quality Standards 11-2
11-2-3 NAAQS Attainment Status and State Implementation Plans 11-4
11-2-4 Conformity with State Implementation Plans 11-6
11-3 Methodology 11-8
11-3-1 Screening Analysis 11-8
11-3-2 Roadway Emissions and Dispersion Analysis 11-8
11-3-2-1 Vehicle Emissions 11-9
11-3-2-2 Analysis Years 11-9
11-3-2-3 Dispersion Model for Microscale Analyses 11-10
11-3-2-4 Meteorology 11-11
11-3-2-5 Traffic Data 11-11
11-3-2-6 Background Concentrations 11-11
11-3-2-7 Receptor Locations 11-12
11-3-3 Evaluating Air Quality Impacts 11-12
11-4 Affected Environment 11-13
11-5 Environmental Effects 11-13
11-5-1 No Build Alternative 11-13
11-5-2 Replacement Bridge Alternative 11-14
11-6 Mitigation 11-17

Chapter 12: Noise and Vibration 12-1
12-1 Introduction 12-1
12-2 Regulatory Requirements 12-1
12-3 Methodology 12-2
12-3-1 Noise and Vibration Fundamentals and Terminology 12-2
12-3-1-1 Noise 12-2
12-3-1-2 Vibration 12-4

12-3-2 Traffic Noise Analysis Methodology 12-4
12-3-3 Impact Criteria 12-5
12-3-3-1 FHWA and NYSDOT Criteria 12-5
12-4 Affected Environment 12-6
12-4-1 Introduction 12-6
12-4-2 Potentially Affected Land Uses 12-7
12-4-3 Measurements of Existing Noise Levels 12-7
12-4-3-1 Determination of Critical Analysis Hour(s) 12-7
12-4-3-2 Analysis Hour Noise Measurements 12-8
12-4-4 Comparison of Measured and Modeled Existing Noise Levels 12-9
12-5 Environmental Effects 12-10
12-5-1 No Build Alternative 12-10
12-5-2 Replacement Bridge Alternative 12-12
12-5-2-1 Short Span Option 12-12
12-5-2-2 Long Span Option 12-13
12-5-3 Conclusions 12-14
12-6 Mitigation 12-14
12-6-1 Introduction 12-14
12-6-2 Traffic Management 12-15
12-6-3 Alteration of Vertical and Horizontal Alignment 12-16
12-6-4 Noise Barriers 12-16
12-6-5 Buffer Zones 12-19
12-6-6 Noise Insulation 12-19

Chapter 13: Energy and Climate Change 13-1
13-1 Introduction 13-1
13-2 Environmental Effects 13-1
13-2-1 No Build Alternative 13-1
13-2-2 Replacement Bridge Alternative 13-1
13-3 Measures to Reduce Greenhouse Gas Emissions 13-2
13-4 Mitigation 13-3

Chapter 14: Topography, Geology, and Soils 14-1
14-1 Introduction 14-1
14-2 Regulatory Context 14-1
14-3 Methodology 14-1
14-4 Affected Environment 14-2
14-4-1 Topography 14-2
14-4-2 Geology 14-2
14-4-2-1 Bedrock Geology 14-2
14-4-2-2 Surficial Geology 14-3
14-4-2-3 Seismic Conditions 14-3
14-4-3 Soils 14-3

14-5 Environmental Effects 14-5
14-5-1 No Build Alternative 14-5
14-5-2 Replacement Bridge Alternative 14-5
14-5-2-1 Topography 14-5
14-5-2-2 Geology 14-5
14-5-2-3 Soils 14-6
14-6 Mitigation 14-6

Chapter 15: Water Resources 15-1
15-1 Introduction 15-1
15-2 Regulatory Context 15-1
15-3 Methodology 15-3
15-3-1 Stormwater Analysis Methodology 15-4
15-3-2 Scour and Deposition Analysis Methodology 15-5
15-4 Affected Environment 15-6
15-4-1 Groundwater Resources 15-6
15-4-2 Surface Water Resources 15-6
15-4-2-1 Watersheds and Waterbodies 15-6
15-4-2-2 Floodplains 15-7
15-4-2-3 Water Quality 15-7
15-4-3 Sediment Quality 15-10
15-4-3-1 Sediment Characteristics 15-10
15-4-3-2 Sediment Scour And Deposition 15-10
15-4-3-3 Sediment Quality 15-11
15-5 Environmental Effects 15-16
15-5-1 No Build Alternative 15-16
15-5-1-1 Groundwater Resources 15-16
15-5-1-2 Surface Water Resources 15-16
15-5-1-3 Sediments 15-16
15-5-2 Replacement Bridge Alternative 15-16
15-5-2-1 Groundwater Resources 15-17
15-5-2-2 Surface Water Resources 15-17
15-5-2-3 Sediments 15-22
15-6 Mitigation 15-22

Chapter 16: Ecology 16-1
16-1 Introduction 16-1
16-2 Regulatory Context 16-1
16-2-1 Federal 16-1
16-2-2 New York State 16-4
16-3 Methodology 16-5
16-3-1 Study Area 16-5
16-3-2 Data Sources 16-5
16-4 Affected Environment 16-6

16-4-1 Terrestrial Resources 16-6
16-4-1-1 Terrestrial Ecological Communities 16-6
16-4-1-2 Wildlife 16-8
16-4-1-3 Threatened, Endangered, and Special Concern Species ..16-10
16-4-2 Aquatic Resources 16-14
16-4-2-1 Wetlands 16-15
16-4-2-2 Aquatic Biota 16-16
16-4-3 Special Habitat Areas 16-25
16-4-3-1 USFWS Significant Habitats 16-25
16-4-3-2 Significant Coastal Fish and wildlife habitat 16-25
16-4-3-3 Essential Fish Habitat (EFH) 16-26
16-5 Environmental effects 16-26
16-5-1 No Build Alternative 16-26
16-5-2 Replacement Bridge Alternative 16-27
16-5-2-1 Terrestrial Resources 16-27
16-5-2-2 Aquatic Resources 16-31
16-5-2-3 Special Habitats 16-34
16-6 Mitigation 16-35

Chapter 17: Hazardous Waste and Contaminated Materials 17-1
17-1 Introduction 17-1
17-2 Regulatory Context 17-1
17-3 Methodology 17-2
17-4 Affected Environment 17-2
17-5 Environmental Effects 17-4
17-5-1 No Build Alternative 17-4
17-5-2 Replacement Bridge Alternative 17-5
17-6 Mitigation 17-5

Chapter 18: Construction Impacts 18-1
18-1 Introduction 18-1
18-2 Construction Sequence and Schedule 18-2
18-2-1 Landings 18-2
18-2-2 Approaches 18-2
18-2-3 Main Spans 18-2
18-3 Construction of Key Elements 18-3
18-3-1 Waterfront Construction Staging 18-3
18-3-2 In-Land Construction Staging 18-3
18-3-3 Dredged Access Channel 18-6
18-3-4 Transport and Disposal of Dredged Material 18-8
18-3-5 Substructure Construction 18-9
18-3-6 Construction of Bridge Superstructure 18-14
18-3-7 Existing Bridge Demolition 18-14

18-3-8 Construction Analysis Framework 18-15
18-3-9 Other Environmental Performance Commitments 18-17
18-4 Social, Economic, and Environmental Impacts 18-20
18-4-1 Transportation 18-20
18-4-2 Community Character 18-24
18-4-3 Land Acquisition, Displacement, and Relocation 18-27
18-4-4 Parklands and Recreational Resources 18-27
18-4-5 Socioeconomic Conditions 18-28
18-4-6 Visual and Aesthetic Resources 18-31
18-4-7 Historic and Cultural Resources 18-32
18-4-8 Air Quality 18-33
18-4-9 Noise and Vibration 18-45
18-4-10 Energy and Climate Change 18-56
18-4-11 Topography, Geology, and Soils 18-63
18-4-12 Water Resources 18-63
18-4-13 Ecology 18-73
18-4-14 Hazardous and Contaminated Materials 18-110
18-5 Mitigation 18-111
18-5-1 Ecology 18-111

Chapter 19: Environmental Justice 19-1
19-1 Introduction 19-1
19-2 Regulatory Context 19-1
19-3 Methodology 19-2
19-3-1 Delineation of Study Area 19-2
19-3-2 Identification of Environmental Justice Populations 19-3
19-4 Affected Environment 19-4
19-4-1 Minority Status Analysis 19-4
19-4-1-1 Operational Study Area 19-4
19-4-1-2 Construction Study Area 19-5
19-4-2 Poverty Status Analysis 19-6
19-4-2-1 Operational Study Area 19-6
19-4-2-2 Construction Study Area 19-6
19-5 Environmental Effects 19-7
19-5-1 Summary of Adverse Effects 19-7
19-5-2 Analysis of the Potential for Disproportionately High and Adverse Impacts 19-8
19-6 Public Participation 19-11
19-7 Mitigation for Disproprionately High and Adverse Effects 19-11

Chapter 20: Coastal Area Management 20-1
20-1 Introduction 20-1
20-2 Regulatory Context 20-1
20-3 Methodology 20-2

20-4 Affected Environment 20-2
20-5 Coastal Zone Policy Analysis 20-2
20-5-1 No Build Alternative 20-2
20-5-2 Replacement Bridge Alternative 20-2
20-5-2-1 Coastal Zone Policies 20-3
20-5-2-2 Fish and Wildlife Policies 20-4
20-5-2-3 Flooding and Erosion Policies 20-5
20-5-2-4 General Safeguards Policy 20-7
20-5-2-5 Public Access Policies 20-7
20-5-2-6 Recreation Policies 20-8
20-5-2-7 Historic Resources and Visual Quality Policies 20-8
20-5-2-8 Agricultural Lands Policy 20-9
20-5-2-9 Energy and Ice Management Policies 20-10
20-5-2-10 Water and Air Resources Policies 20-10
20-5-2-11 Wetlands Policy 20-13

Chapter 21: Indirect and Cumulative Effects 21-1
21-1 Introduction 21-1
21-2 Indirect Effects 21-1
21-3 Cumulative Effects 21-2
21-3-1 Operational Effects 21-2
21-3-2 Construction Effects 21-2
21-3-2-1 Aquatic Ecology 21-4
21-3-2-2 Dredging 21-4

Chapter 22: Other NEPA and SEQRA Considerations 22-1
22-1 Introduction 22-1
22-2 Irreversible and Irretrievable Commitment of Resources 22-1
22-2-1 No Build Alternative 22-1
22-2-2 Replacement Bridge Alternative 22-2
22-3 Relationship between Short-term Uses of the Environment and Long-Term Productivity 22-2
22-3-1 No Build Alternative 22-2
22-3-2 Replacement Bridge Alternative 22-2
22-4 Unavoidable Impacts 22-3
22-4-1 No Build Alternative 22-3
22-4-2 Replacement Bridge Alternative 22-3
22-5 New York State Smart Growth Public Infrastructure Policy Act 22-5
22-5-1 No Build Alternative 22-5
22-5-2 Replacement Bridge Alternative 22-5

Chapter 23: Draft Section 4(f) Evaluation 23-1
23-1 Introduction 23-1
23-2 Regulatory Context 23-1

23-2-1 *De Minimis* Impacts 23-2
23-2-2 Programmatic Section 4(f) Evaluation for Historic Bridges 23-3
23-2-3 Section 4(f) Review Process..... 23-4
23-3 Applicability of Section 4(f) to the Project 23-5
23-4 Section 4(f) Evaluation..... 23-6
23-4-1 Tappan Zee Bridge 23-6
23-4-1-1 Description of the Use of the Section 4(f) Property 23-6
23-4-1-2 AlternativeS to Avoid the Use of the Section 4(f) Property.. 23-6
23-4-1-3 Measures to Minimize Harm..... 23-10
23-4-2 Elizabeth Place Park..... 23-11
23-4-3 South Nyack Historic District 23-11
23-4-3-1 Description of the Use of the Section 4(f) Property 23-12
23-4-3-2 Avoidance Alternatives..... 23-12
23-4-3-3 Least Harm Alternatives..... 23-13
23-4-3-4 Measures to Minimize Harm..... 23-15
23-5 Coordination 23-15

List of Preparers .....List of Preparers - 1

List of Recipients ..... List of Recipients - 1

Appendices (Volume II)

Appendix A: Replacement Bridge Design Options

Appendix B: Transportation

Appendix C: Historic and Cultural Resources

Appendix D: Noise and Vibration

Appendix E: Water Resources

Appendix F: Ecology

Appendix G: Hazardous Wastes and Contaminated Materials

Appendix H: Construction Impacts

List of Tables

2-1 Planned Developments Within the Study Area 2-2
2-2 Notable Transportation Improvement Program (TIP) Projects in the Study Area 2-3
3-1 Permits and Approvals by Agency 3-9
4-1 Accident Rates for the Tappan Zee Bridge and New York State (2008 to 2010) 4-8
4-2 Traffic Incident Frequency of Occurence on the Tappan Zee Bridge 4-9
4-3 Ship and Barge Movements on the Hudson River 4-10
4-4 Projected Peak Hour Traffic Volumes and Average Annual Growth Rates for the Tappan Zee Bridge 4-13
5-1 Community Facilities 5-17
5-2 Planned Developments Within the Study Area 5-18
6-1 Town of Orangetown Real Property (Tax Parcels) for Full or Partial Acquisition–Existing Conditions 6-5
6-2 Town of Orangetown Taxing Districts, Tax Levies, and Tax Rates 6-6
6-3 Town of Greenburgh Tax Lots for Acquisition 6-6
6-4 Town of Greenburgh Taxing Districts, Tax Levies, and Tax Rates 6-7
6-5 Property Acquisitions for the Replacement Bridge Alternative 6-8
6-6 Estimated Reduction in Property Taxes in Rockland County (Short Span Option) 6-9
6-7 Estimated Reduction in Property Taxes in Rockland County (Long Span Option) 6-10
6-8 Estimated Property Tax Impacts in Rockland County (Short Span Option) 6-12
6-9 Estimated Property Tax Impacts in Rockland County (Long Span Option) 6-13
6-10 Estimated Reduction in Propety Taxes in Westchester County (Long Span and Short Span Options) 6-13
6-11 Estimated Property Tax Impacts in Westchester County (Long Span and Short Span Options) 6-14
7-1 Study Area Parklands and Trails 7-2
8-1 2000 and 2010 Population 8-3
8-2 NYMTC Population Projections (in 000s) 8-4
8-3 2000 and 2010 Age Distribution 8-5
8-4 2000 Disabled Population 8-5

8-5 2000 and 2010 Household Characteristics 8-5
8-6 Median Household Income and Poverty Status 8-6
8-7 Housing Unit Characteristics 8-7
8-8 Housing Value Characteristics (2000, 2005-2009) 8-8
8-9 Average Annual Labor Force 8-8
8-10 2010 Employment—Rockland County Study Area 8-9
8-11 2010 Employment—Westchester County Study Area 8-10
8-12 Unemployment 8-11
9-1 Visual Simulations 9-19
10-1 Architectural Resources within the APE 10-9
10-2 Architectural Resources within the APE 10-23
11-1 National Ambient Air Quality Standards (NAAQS) 11-3
11-2 Non-Attainment Areas in the Project Study Area 11-4
11-3 Net Emission Rate Calculation by Analysis Year 11-10
11-4 Representative Monitored Ambient Air Quality Data for Criteria Pollutants, 2008 to 2010 11-14
11-5 Total Maximum Predicted CO Concentrations (ppm) 11-15
11-6 Maximum Predicted PM Concentration Increments (μg/m^3) 11-16
11-7 Maximum Total Predicted PM Concentrations along Shared-Use Path (μg/m^3) 11-16
12-1 Common Noise Levels 12-3
12-2 FHWA Noise Abatement Criteria Hourly A-Weighted Sound Levels (dBA) ... 12-6
12-3 Selected Measurement Locations 12-8
12-4 2005 Leq(1) AM Peak Hour Noise Measurement Results 12-9
12-5 Comparison of 2005 Measurement and TNM-Predicted Leq(1) Noise Levels 12-9
12-6 2010 Existing Conditions-Number of Properties Exceeding NAC 12-10
12-7 No Build Alternative-AM Peak Hour Leq(1) Noise Levels 12-11
12-8 No Build Alternative-Number of Properties Exceeding NAC 12-11
12-9 Short Span Option-AM Peak Hour Leq(1) Noise Levels 12-12
12-10 Short Span Option-Number of Properties Exceeding NAC 12-13
12-11 Long Span Option-AM Peak Hour Leq(1) Noise Levels 12-13
12-12 Long Span Option-Number of Properties Exceeding NAC 12-14
12-13 Summary of Noise Barrier Feasibility and Cost-Benefit Analysis–Short Span Option and Long Span Option Westchester County 12-17
12-14 Summary of Noise Barrier Feasibility and Cost-Benefit Analysis–Short Span Option Rockland County 12-18
12-15 Summary of Noise Barrier Feasibility and Cost-Benefit Analysis–Long Span Option Rockland County 12-19

14-1 Soils in the Study Area 14-4
15-1 ERL and ERM Screening Criteria 15-11
15-2 TOGS 5.1.9 Sediment Quality Thresholds 15-12
15-3 Metals 15-13
15-4 SVOCs 15-14
15-5 Pesticides, PCBs, and Dioxins 15-15
15-6 Impervious Surface Comparison 15-20
15-7 Pollutant Loading Comparison 15-21
15-8 Pollutant Loading Comparison for Landings Only 15-21
16-1 Threatened, Endangered, Candidate, and Special Concern Species 16-11
16-2 List of Fish Species Occurring within the Project Area Based on Gill-net Sampling, 2007-2008 16-21
16-3 Federally Managed Species with Essential Fish Habitat (EFH) Designations in the Project Sites 16-22
18-1 Dredging Quantities for the Replacement Bridge Alternatives 18-7
18-2 Daily Materials Removal by Construction Stage 18-8
18-3 Pile Driving, Short Span Option 18-10
18-4 Pile Driving, Long Span Option 18-10
18-5 Major Construction Equipment Required for Bridge Construction 18-16
18-6 Major Construction Equipment Required for Roadway Construction 18-17
18-7 One-Way Peak Daily Construction Trips In-land to Waterfront Staging Area (near Interchange #12) 18-23
18-8 Economic Benefits from Construction 18-30
18-9 Maximum Predicted Pollutant Concentrations from Construction Site Sources—Rockland Landing, Reconstruction of the South Broadway Bridge (µg/m3) 18-39
18-10 Maximum Predicted Pollutant Concentrations from Construction Site Sources—Rockland Landing, Approach Roadway Construction (µg/m3) 18-40
18-11 Maximum Predicted Pollutant Concentrations from Construction Site Sources—Rockland Inland Staging Area (µg/m3) 18-40
18-12 Maximum Predicted Pollutant Concentrations from Construction Site Sources—Bridge Construction, Rockland Approach and Main Span (µg/m3) 18-41
18-13 Maximum Predicted Pollutant Concentrations from Construction Site Sources—Westchester Landing (µg/m3) 18-41
18-14 Maximum Predicted Pollutant Concentrations from Construction Site Sources—Bridge Construction, Westchester Approach and Main Span (µg/m3) 18-42
18-15 Maximum Predicted Pollutant Concentrations from Mobile Sources—Rockland County (µg/m3) 18-42

18-16 Maximum Predicted Pollutant Concentrations from Mobile Sources—Westchester County (µg/m3) 18-43
18-17 Total Regional Emissions from Construction Activities (ton/yr) 18-44
18-18 Highway Construction Equipment Noise Reference Levels and Usage Factors from RCNM 1.1 18-47
18-19 Selected Noise Receptor Locations 18-48
18-20 Existing Noise Levels at Construction Noise Receptors 18-49
18-21 Construction Noise Analysis Results Without Noise Abatement Measures .. 18-50
18-22 Construction Noise Analysis Results With Noise Abatement Measures. 18-53
18-23 Vibration Source Levels for Construction Equipment 18-55
18-24 Total Construction Truck Trips and Distances 18-59
18-25 Greenhouse Gas Emissions—Long Span Option 18-61
18-26 Greenhouse Gas Emissions—Short Span Option 18-61
18-27 Overwater Coverage from Platforms 18-75
18-28 Potential Loss of River Bottom, Wetlands, and Adjacent Area Habitats due to Project Activities 18-75
19-1 Operational Study Area Race and Ethnicity 19-4
19-2 Construction Study Area Race and Ethnicity 19-5
19-3 Operational Study Area Poverty Status 19-6
19-4 Construction Study Area Poverty Status 19-7
22-1 Replacement Bridge Alternative's Consistency with New York State Smart Growth Public Infrastructure Policy Act 22-6

List of Figures

1-1 Project Location and Regional Roadway Network 1-2
1-2 Existing Bridge Plan, Profile, and Photographs....1-2
1-3 Traffic Volumes....1-3
1-4 Population and Employment Growth: 2010 to 2047 1-3
1-5 Accident Rates 1-5
2-1 Options That Would Not Preclude Transit....2-6
2-2 Replacement Bridge Alternative 2-7
2-3 Rockland Landing....2-8
2-4 Westchester Landing....2-8
2-5 Approach Spans Options....2-11
2-6 Main Spans Options 2-12
2-7 Replacement Bridge Alternative: Roadway Configuration....2-13
4-1 Tappan Zee Bridge Average Annual Daily Traffic Volumes 4-4
4-2 Tappan Zee Bridge 2010 Average Weekday Traffic Volumes 4-4
4-3 Tappan Zee Bridge 2011 Typical Weekday Truck Volumes 4-4
4-4 Traffic Incidents 4-7
5-1 Study Area Land Use 5-1
5-2 Rockland County Land Use....5-2
5-3 Westchester County Land Use....5-2
5-4 Rockland County Zoning 5-17
5-5 Westchester County Zoning 5-17
5-6 Community Facilities 5-17
6-1 Land Acquisitions – Rockland County Short Span 6-3
6-2 Land Acquisitions – Rockland County Long Span....6-3
6-3 Land Acquisitions – Westchester County Short/Long Span 6-3
7-1 Parklands and Recreational Resources 7-1
7-2 Elizabeth Place Park 7-5
7-3 Green Space 7-5
7-4 RiverWalk 7-5

10-4 Architectural Resources in APE: Detail of Rockland County South..... 10-6
10-5 Architectural Resources in APE: Detail of Westchester County North 10-6
10-6 Architectural Resources in APE: Detail of Westchester County South..... 10-6
10-7 Short Span Option – Rockland County 10-25
10-8 Long Span Option – Rockland County..... 10-25
11-1 Mobile-Source Analysis Receptor Locations Rockland County 11-12
11-2 Mobile-Source Analysis Receptor Locations Westchester County 11-12
12-1 Study Area Land Use..... 12-7
12-2 Noise Measurement Sites..... 12-7
12-3 Hourly L_{eq} in dBA at Long-Term (24 Hour) Measurement Site 12-8
12-4 Existing 2010 AM Peak Hour Noise Contours: Westchester County..... 12-10
12-5 Existing 2010 AM Peak Hour Noise Contours: Rockland County..... 12-10

12-6 Selected Noise Receptor Sites 12-10
12-7 Locations Where the 2047 AM Peak Hour Levels Exceed the NACs for the No Build Alternative: Westchester County 12-11
12-8 Locations Where the 2047 AM Peak Hour Levels Exceed the NACs for the No Build Alternative: Rockland County 12-11
12-9 Locations Where the 2047 AM Peak Hour Levels Exceed the NACs for the Short Span Option: Westchester County 12-12
12-10 Locations Where the 2047 AM Peak Hour Levels Exceed the NACs for the Short Span Option: Rockland County 12-12
12-11 Locations Where the 2047 AM Peak Hour Levels Exceed the NACs for the Long Span Option: Westchester County 12-14
12-12 Locations Where the 2047 AM Peak Hour Levels Exceed the NACs for the Long Span Option: Rockland County 12-14
12-13 Locations Where the 2047 AM Peak Hour Levels Exceed the NACs for the Short Span Option with Noise Barriers: Westchester County 12-17
12-14 Locations Where the 2047 AM Peak Hour Levels Exceed the NACs for the Long Span Option with Noise Barriers: Westchester County 12-17
12-15 Locations Where the 2047 AM Peak Hour Levels Exceed the NACs for the Short Span Option with Noise Barriers: Rockland County 12-17
12-16 Locations Where the 2047 AM Peak Hour Levels Exceed the NACs for the Short Span Option with Wall 1 on Structure: Rockland County 12-17
12-17 Locations Where the 2047 AM Peak Hour Levels Exceed the NACs for the Long Span Option with Noise Barriers: Rockland County 12-17
12-18 Locations Where the 2047 AM Peak Hour Levels Exceed the NACs for the Long Span Option with Wall 1 on Structure: Rockland County 12-17
